README

Instructions for the user:

After running the application, do the next steps:

1. Enter number 1 to the console (to specify the directory you'd like to analyse)
2. Enter the name of the directory with text files, for example: C:\Users\marij\Desktop\textfiles
3. Enter number 2 to the console (to specify the size of the n-gram)
4. Enter the number between 1 and 5 (the n-gram size)
5. Enter number 3 to the console (to specify the name of the output file)
6. Enter the name of the output file, for example ngrams.txt or output.csv
7. Enter number 4 to the console (to build the n-grams)
8. Enter number 5 to the console (to save the output file)
